

## AL580-HDX

HIGH CAPACITY LIFT FOR  
LARGE MID-WHEEL POWER WHEELCHAIRS

### LIFTS UP TO 450 LB

The AL580-HDX is designed to lift and transport heavy mid-wheel power wheelchairs with wheel sizes from 10" - 14". These mobility devices are secured with a combination of 4-Q'straint retractors and a hold-down arm.

The Stars-N-Stripes platform guards against road debris and in some cases the optional swing-away maintains access to a vehicle's cargo area. The AL580-HDX is compatible with a variety of SUV's, trucks, and crossovers.

Adjustable hold-down arm

4 Q-Straint retractors secure your mobility device in place.

Stars-N-Stripes platform is engineered to prevent road debris from damaging the underside of your power wheelchair.

*The AL580-HDX allows me to take my custom power wheelchair without sacrificing my cargo space. Love its ease of use.*

Adjustable wheel cradles ensure securement and prevent damage during transport.

## PN# PRODUCT SPECIFICATIONS

**LIFTING CAPACITY** 450 lb
